COACH JOKES: Q: How did the fruit fix its bad chess position?
A: It "repeated" it 😊

TACTICAL TIPS + TRICKS: Tremendous, Terrific, Techniques + Tips Try to play carefully, safety first #3

Or in other words, "when you think of a move, wait. Look for a better one." Hi guys, this classic advice from former World Chess Champion Emmanuel Lasker really sums up what chess is all about. That is, looking out for ALL your opponent's threats. Playing safety first. Now, it's impossible to see everything your opponent's threatening. We are not robots 😊 But, if we have this one idea in our minds when our opponent's move (just thinking about what they're trying to do), then we can stop them in their tracks. We can stop their ideas of winning our pieces and we can especially stop their ideas of getting checkmate against us. It just comes with more experience, but remember, as SuperCoach always says, chess is only 50% us, it's 50% the opponent too :)

PESKY PUZZLES:

Question:
How does white line up two of black's pieces here for a pawn fork? 😊

W

In each position find the best move/moves.
